

SaveWithBanks

Product Guide

A clear overview of how the platform works

Prepared for product owners and stakeholders

Version 1.0 | March 2026

1. Executive Summary

SaveWithBanks is a mobile-friendly savings platform designed for users in Cameroon. It helps people save money toward personal goals with structure, discipline, and accountability.

Users lock money into timed savings goals (3, 6, or 12 months). Deposits are made via Mobile Money with screenshot proof. An admin team approves deposits and processes withdrawal payouts. The platform enforces a minimum reserve balance, early-withdrawal penalties, and a discipline scoring system.

The product is delivered as a Progressive Web App (PWA) - installable on phones like a native app.

Currency	Central African CFA franc (FCFA / XAF)
Payment method	Mobile Money (manual, human-verified)
Primary users	Individual savers
Operations team	Platform administrators

2. What Problem Does It Solve?

Many people want to save but struggle with:

- No clear target - money sits in a wallet and gets spent
- No lock-in - easy to withdraw before the goal is reached
- No accountability - no record of progress or consequences

How SaveWithBanks helps

- Named savings goals with target amount and duration
- Funds locked into goals until maturity or penalized early withdrawal
- Dashboard, transaction history, and notifications for visibility
- Admin control over deposit verification and payout processing

3. Who Uses the Platform?

3.1 Savers (Customers)

Individual users who register, create goals, deposit money, and withdraw when allowed. They use the main app: dashboard, goals, deposits, history, profile, help, and financial tips.

3.2 Administrators (Operations Team)

Trusted staff who run day-to-day operations:

- Approve or reject deposit requests
- Send withdrawal payouts via Mobile Money and mark as paid

- Manage users (view details, suspend accounts, adjustments)
 - Configure penalties and deposit instructions
 - Publish tips, send notifications, export reports, review audit logs
- Admins use a separate admin console with its own navigation and tools.

4. How Money Moves Through the Platform

Important: The platform does NOT automatically move money. Deposits and withdrawals rely on real Mobile Money transfers verified and executed by humans.

5. The Saver Journey

Step 1 - Registration & Login

Users sign up with email and password, providing name and phone number.

Step 2 - Onboarding

Step	What happens
Email verification	User confirms their email address
Terms acceptance	User agrees to platform terms
First goal	User creates at least one savings goal
First deposit	User is guided to fund their goal

Step 3 - Account Activation

New accounts start Pending with 0 FCFA balance. To activate, the user needs an approved deposit of at least 1,000 FCFA. This becomes a permanent reserve that cannot be withdrawn. Account status then becomes Active.

Step 4 - Ongoing Use

- Create additional goals (3, 6, or 12 months)
- Deposit via Mobile Money; track progress on dashboard

- Withdraw when allowed; receive notifications
- Read financial tips via the Help section

6. Savings Goals Explained

Field	Description
Title & description	What the user is saving for
Target amount	Goal amount in FCFA
Duration	3, 6, or 12 months
Maturity date	Start date + duration (auto-calculated)
Current amount	Approved deposits in this goal

Goal Statuses

Status	Meaning
Active	Running; user can deposit and withdraw (subject to rules)
Matured	Duration ended; withdraw without early penalty
Completed	User marked goal complete after maturity
Withdrawn early	Money taken before maturity; penalty applied
Cancelled	Cancelled only if empty and still active

When maturity date is reached, the system updates the goal to Matured and notifies the user (daily check).

7. Deposits - How Users Add Money

User steps

- 1. Open a goal and choose Deposit
- 2. See platform Mobile Money instructions (phone + account name)
- 3. Send payment from their Mobile Money
- 4. Upload screenshot of payment confirmation
- 5. Submit the deposit request

What happens next

- Request appears in admin queue as Pending
- Admin approves or rejects after reviewing screenshot
- Approval: funds added to goal; user notified
- Rejection: user notified with reason; no credit
- Rule: only one pending deposit per goal at a time

8. Withdrawals & Penalties

When can users withdraw?

- From active goals anytime (penalty if before maturity)
- From matured goals without early-withdrawal penalty

Early withdrawal penalties (defaults)

Goal duration	Penalty rate
3 months	5%
6 months	7%
12 months	10%

Admins can adjust these rates in the admin console.

Withdrawal process

- 1. User enters amount and sees penalty preview
- 2. Payout phone required in profile
- 3. Amount (+ penalty) deducted from goal and account
- 4. Status: Pending Payout
- 5. Admin sends Mobile Money to payout phone
- 6. Admin marks Paid (optional transaction reference)
- 7. User notified

Reserve rule: every active account must keep 1,000 FCFA that cannot be withdrawn.

9. Discipline Scoring

Action	Points
First deposit in a calendar month	+20
Completing a matured goal	+100
Early withdrawal	-50

Levels: Bronze, Silver, Gold, Platinum

Displayed on profile. Perks are informational - they do not change financial rules.

10. Notifications & Engagement

In-app notifications

- Deposit approved or rejected
- Withdrawal processing and payout sent
- Goal matured; account status changes
- Direct admin messages

Finance feed

Admins publish financial tips. Savers can read, like, comment, and save tips. Access via the Help section.

11. Admin Console Overview

Section	Purpose
Dashboard	KPIs, pending alerts, weekly trends
Deposits	Review queue: pending / approved / rejected
Payouts	Process withdrawals; record references
Users	Search savers; full account detail
Finance Feed	Tips CMS; comment moderation
Penalties	Early-withdrawal percentages
Reports	CSV export: transactions, withdrawals, deposits, users
Settings	Mobile Money deposit instructions
Audit Log	Admin action accountability
Notifications	Message individual users
Team	Promote or remove admins

Admin actions on users

- View balance, goals, transactions, discipline score
- Suspend, reactivate, or close accounts
- Credit/refund or debit balances (reason required)
- Mark phone verified; send notifications

Sensitive actions are recorded in the audit trail.

12. Account Statuses

Status	Meaning
Pending	New account; needs 1,000 FCFA approved deposit
Active	Fully operational
Suspended	Deposits and withdrawals blocked
Closed	No further activity

13. Key Business Rules

Rule	Detail
Currency	FCFA (XAF)

Activation	Min 1,000 FCFA deposit (permanent reserve)
Reserve	1,000 FCFA cannot be withdrawn
Goal durations	3, 6, or 12 months only
Deposits	Manual MoMo + admin approval
Withdrawals	Manual MoMo payout + admin marks paid
Pending deposits	One per goal at a time
Early withdrawal	Penalty % by duration
Group savings	Not supported
Auto payouts	Not supported

14. Security & Trust

- Email + password login; email verification required
- Users see only their own financial data
- Admin access gated by admin role
- Deposit proofs stored securely
- Admin money actions audited
- Admins can enable two-factor authentication (MFA)

15. What the Platform Does Not Do

- No automatic Mobile Money integration - transfers are manual
- No group / joint / tontine savings
- No bank card payments
- No automated fraud detection on screenshots - human review
- No App Store native apps - PWA via browser (installable)

16. Glossary

Term	Definition
FCFA / XAF	Central African CFA franc
Mobile Money	Phone-based transfer (MTN MoMo, Orange Money, etc.)
Goal	Named savings target with amount and duration
Reserve	1,000 FCFA minimum non-withdrawable balance
Maturity	Date when goal lock period ends
Penalty	Fee for withdrawing before maturity
PWA	Web app installable on a phone

Admin	Operations staff with admin console access
Audit log	Record of admin actions

17. Summary

SaveWithBanks is a disciplined personal savings platform for the Cameroon market. Savers commit to goals, deposit via Mobile Money, and build habits through structure and scoring. Operators maintain trust by verifying deposits, processing payouts, and managing the platform through the admin console.

SaveWithBanks - Product documentation for internal stakeholders.
